My power steering leaks, and this is most pronounced in the winter, maybe due to colder temps. I did have the high and low-pressure hoses changed, and a new pump installed 5,000 miles / 3 years ago. I suspect they may have put in the wrong type of power steering fluid, or done a bad job.

This 1982 Mercedes-Benz 240D was initially delivered to Knoxville Motor Company in Knoxville, Tennessee, and is said to have remained under the care of the original owner's family until the seller's purchase in May 2017. ... R134a-based air conditioning, and a Pioneer infotainment system. This W123 240D is now offered with a window sticker ...

I flushed the system and replaced the fluid with power steering fluid. The rest of the steering components show no wear and are very tight. About 3 decades ago GM realized the same thing was happening with their power steering boxes when using ATF. They released a bulletin recommending changing out ATF for power steering fluid.

The 1982 model year also marked a major facelift for the W123 - all models were equipped with rectangular broadband headlights and power steering was offered standard across the range. When the W123 went out of production in 1986 it had surpassed the Stroke Eight as the bestselling Mercedes-Benz with more than 2.5 million cars sold.
