2006 Prius. KK6PD said: ?. OK I'll bite, whats a "brake capacitor" ... It's the black box in the back that partly blocks the 12 volt battery and has a label that (from memory) refers to brake backup power source assy, something like that. #5 cwerdna, Jun 6, 2011. northwichita ... Here is the URL for the eBay search for these things! prius ...

But you have to do that without opening the driver's door, which will awaken the brake ECU and pump the pressure back up. If you remove the fuses for the brake pump, you can zero-down the system by pumping the brake pedal (in any Prius generation except Gen 2). You'll get around twenty or thirty strokes before the pedal suddenly feels quite hard.

Fits CAMRY, HIGHLANDER, PRIUS Brake control. BRAKE POWER SUPPLY. GS 430, 460, brake power supply. Power supply. ... W/HYBRID, brake power supply. 18 people have looked at this part recently Diagrams and Kits; What This Fits; Product Types; Services; ABS & VSC. &gt; Gen 2 (2004-2009) Toyota Prius Forums &gt; Gen 2 Prius Care, Maintenance and Troubleshooting &gt; Attachments are working again! ... 2006 320 57 3 Location: Prescott, AZ Vehicle: 2004 Prius ... it is much easier to move the brake power supply to gain access to the 12V battery, and the wiring harness has sufficient slack so that it is not necessary ...

And that box is the Brake Power Control Assy. It's a back up booster for the brakes. Its just a 12 volt box. Nothing scary there just unplug it and plug in new used one. And lastly if you had liability on the car they should fix it in a hit in run.

## 2006 prius brake backup power supply youtube

(this pump sounds like a rattlesnake when the pump is running. Repeatedly press the brake pedal to force this pump to run while the Prius is READY, so you can identify when it is running.) If yes, that is an excellent indication that the brake actuator needs to be replaced and confirms that DTC C1256 and C1391 are correct.

Greetings and welcome to Prius Geekery! Because the 12v in a Prius doesn't power the engine starter and the HV Battery does, the criminals who bought Optima and moved the manufacturing plant to Mexico turned one of the highest rated batteries of the 1990's into total garbage and they get away with it because in Prius' case the 12v system needs no cold ...

It would be a number 81, 82, 83 or 84. 83 points directly to the brake backup power supply (capacitors in the trunk next to the 12V battery). C1378 is incredibly rare, and I believe the service manual is wrong, as it states as a possible cause "malfunction in backup power supply" yet the trouble area is the skid control ECU.

[quote="ken1784If power failure occurred on the brake system, the backup super-capacitor power is used to drive the system. Then, if you used up the backup power, the master cylinder supplies the oil pressure directly to the front wheels, so it has fail-safe feature. Ken@Japan[/quote] Right, a POWER failure.

Prius Prime plug-out, backup power supply for house. Discussion in "Prime Main Forum (2017-2022)" started by mc510, Oct 9, ... JeffC2006 Junior Member. Joined: Apr 30, 2006 4 3 0. In my Gen 2 Prius I attached a 1500 watt inverter directly to the 12v battery. It worked great. Powered the essentials in the house for a few days using about a ...

I just picked up a 2006 Prius that the previous owner said would drain the 12v battery. I purchased a new AGM battery and installed. ... Try unplugging the brake power supply box next to the battery. #2 TMR-JWAP, Mar 2, 2021. jpkc97 likes this. ... Combo meter works, Backup camera works, now beeps when in reverse as well as beeps when leave key ...

I am still getting the high pitched brake tone and warning lights - skid, abs, red car outline on multi display. Initially the car wouldn't even let me shift into gear, but after cycling the power and doing the paper-clip-jumper/8brake pedal pushes, I have been able to get the car in gear and drive around the block.

Plan on ~1 hour or less for the job. If you're doing this as a planned replacement you will want a backup 12v source hooked up so you don't lose settings and have to initialize systems. If your ...
