Are 200 watt solar panels better than 100 watt?

For a long time, 100-watt panels were the most popular, but as technology advanced and costs have decreased, the use of 200-watt panels is becoming more common. That being said, there are still more of the lower wattage panels on the market, although it is now not unusual to find the 200-watt solar panels in 12V and 24 Volt versions.

Are 200 watt solar panels good for RVs?

If so,a 200-watt (W) panel is your best bet for solar power. You can purchase 200W solar panels as stand-alone panels that are typically retrofitted to RVs for boondocking or used to charge batteries that can run appliances on the go. Because of their lower power output,you won't usually see 200-watt solar panels installed on rooftops.
