

3 cell 41whr lithium ion battery

I just bought a HP Laptop 15-ef0888ca, AMD Ryzen 5 3450U APU, Radeon Graphics, 8 GB Sodimm DDR4 SDRAM, with a 3 cell 41 Wh battery. I basically use my laptop to play Facebook games and seem to only get 3 hours of battery life per charge.

Battery specifications can be 42 wHr 3 cell or 66 wHr 4 cells. It depends on the laptop manufacturer some laptop even have 6 cells, 9-cell or 12-cell batteries. Cells are basically pairs of batteries similar to AA batteries connected in series to give you a single laptop battery.

Some say to keep it charging all the time, some say to remove the battery or only use the battery when electricity is not available. Now this new Laptop has this lithium-ion prismatic...

Actually it is Battery (3-cell, 41 WHr) part # L11119-855. You can order from <https://partsurfer.hp.com/partsurfer?searchtext=L11119-855> . Or use part # to search online stores such as Amazon, Newegg, BestBuy ... Regards.
