

Adding solar panels to your home

Can I add solar panels to my existing solar system?

It's relatively easy to add panels to an existing system; many of the more difficult steps, such as tying your system to the grid, will already be complete. You can explore several options for a system upgrade, depending on your available roof space and the specifications of your solar system.

Should I add solar panels or battery storage to my home?

Most homeowners don't know what their energy needs will be in 10 years. Having the option to add additional solar panels or battery storage to your system down the road can give you the peace of mind that you've invested in a home solar system that benefits you now and in the future.

Should I add more solar panels to my home?

You've expanded your home. If you add an extra room or two to your home or refinish a basement or garage, your electricity bill is likely to increase as well. Adding more solar panels can minimize the financial sting of your home expansion. Furthermore, additions often provide additional roof space for mounting another solar rack.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar.

How do I get more solar panels on my roof?

Working with your original solar installer is the best way to get more panels on your roof. Your initial installer will be comfortable with your system, know which permits you must apply for when adding panels, and what equipment will pair best with your existing system.

Can I add more solar panels if my roof is old?

Do not add more solar panels to your system if your roof is old, it is a leased system, or if you do not have enough roof space for extra panels. Contact your original solar installer to add more panels to your system.

Why add solar panels to an existing solar system?

Key Takeaways. Some of the solar energy pros are: renewable energy, reduced electric bill, energy independence, increased home resale value, long term savings, low maintenance.

Do solar panels save you money? Solar panels save you money over time. The standard amount of time it takes for solar panels to pay for themselves is between six and ten years, although this varies widely. While solar installation can be expensive (up to \$40,000 for large projects), utility savings, tax breaks, and government subsidies help offset the cost.

In contrast, our 8kW DIY solar kits currently range from \$10k-\$15k depending on the components selected. So, after factoring in taxes, shipping, and associated costs, you could save more than \$10,000 on your solar project by installing the system yourself. So what does it take to install your own solar panels?

For homeowners who purchased a home with solar panels--or perhaps installed a system that they've outgrown--there's a pressing question: Can you add to what you already have? Vikki M. Kumar, Panasonic energy storage and solar systems engineer, says that while you can expand an existing PV setup, there are some conditions.

How much value do solar panels add to a home? To make sure your home and property value are seeing a bump in pricing from your solar panels, include specific details about improved energy costs in ...

Adding value: Adding a solar system to your home can also add value directly. It's a value-producing asset that may make your home more valuable in the marketplace, should you decide to sell. This makes sense, of course. If your home is largely similar to other homes in your neighborhood, but uses 50% less electricity, it's cheaper to own.

The excess power your panels create charges your batteries first, and then any additional electricity goes to the grid. When the sun goes down--or the grid goes down--you draw power from the batteries. In general, a battery backup designed to power the whole house will double the cost of your solar system, Pearce says.

Owning rooftop home solar panels can help you stay in control of your monthly electric bill and build long-term financial gains for your household. ...
