It's the LiquiVac Oil Changing System. With the LiquiVac oil changes are a snap. The LiquiVac Small Engine Model works by creating negative pressure, or vacuum power in the tank by pumping the tank handle. Each pump stroke takes air out of the tank creating a vacuum. Just 20 quick pump strokes creates vacuum power in the tank.

The Marina Pro Oil and Fluid Changer's suction hose does directly to the oil pan by vacuuming the oil out the dipstick tube. It's fast, convenient and eliminates messy clean-ups. Simply insert the suction hose into the dipstick tube, pump the handle 40 times, open the valve and Marina Pro extracts the oil directly into its plastic holding tank.
