Commercial structures, including offices and other enterprises, mostly rely on electricity to meet their energy needs. Solar systems are a great option for the majority of commercial buildings ...

Economic analysis of installing roof PV and battery energy storage systems (BESS) has focussed more on residential buildings [16], [17]. Akter et al. concluded that the solar PV unit and battery storage with smaller capacities (PV < 8 kW, and battery < 10 kWh) were more viable options in terms of investment within the lifetime of PV and battery for residential systems.
