

Bp solar energy

What is BP Solar Energy?

Solar energy is a part of bp's five transition growth engines. We're able to combine our world-class solar project development experience with our trading, mobility and customer expertise to deliver renewable power to our customers. In November 2023, we agreed to acquire the remaining 50.03% stake in our solar joint venture Lightsource bp.

What happened to BP Solar?

In 2004, the R&D part of BP Solar was sold to the UK's National Renewable Energy Centre (Narec). In 2013, it became Solar Capture Technologies. In 2010, it closed down the factory at Frederick, Maryland. BP Solar was closed on 21 December 2011 when BP announced its departure from the solar energy business.

How will BP's Solar deal help BP grow its renewables pipeline?

The deal will also grow bp's renewables pipeline from 14GW to 23GW. The assets will be developed through bp's 50-50 solar joint venture Lightsource bp, a global leader in solar energy, applying Lightsource bp's capabilities to accelerate bp's renewables targets.

How will BP's solar deal work?

BP's \$220 million investment in U.S. solar projects will grow its renewables pipeline from 14GW to 23GW. The company plans to start developing around 2.2 GW of the acquisition's pipeline by 2025. The new solar output will be integrated into BP's large U.S. power trading business, which includes onshore wind and natural gas electricity.

What role does solar play in BP's renewables & power transition growth engine?

Solar energy plays a significant role in BP's renewables & power transition growth engine. Through our 50-50 joint venture with Lightsource bp, we have been advancing solar energy projects across the US. In November 2023, we agreed to acquire the remaining 50.03% stake.

Is BP investing in solar projects?

BP is investing in solar projects with a deal for assets having a production capacity of 9 gigawatts. This marks BP's first independent investment in solar since buying a stake in Europe's largest solar developer, Lightsource, in 2017. The new assets will be developed and operated through its 50-50 joint venture with Lightsource BP.
