

What is the energy storage global conference?

The Energy Storage Global Conference offers the opportunity to industry, researchers, and policymakers to exchange views and debate key issues faced by the energy storage sector. The 3-day conference will also explore the extent to which energy storage can help avoid dependency on fossil fuels in order to balance the electricity system.

How is the Brazilian electricity market changing?

The Brazilian electricity market is changing as the country expands the generation of weather-dependent renewable energy based on wind and solar power. At the same time, electricity consumption is set to increase significantly in the coming years.

How can advanced battery technology be used in Brazil?

Innovative approaches can connect individual areas such as electricity, heating, cooling and mobility. In order to make use of the advanced battery technology, the legal, technical, educational and economic framework conditions in Brazil require analysis and, in part, improvement.

Energy storage in Brazil. In our country, we have the conditions to create very interesting solutions that are even more efficient from a financial point of view than those that are emerging and thriving around the world. Two "powerful" examples. 1) Residential hot water. Replacing instant showers with electric storage tanks.

ESA brings the stakeholders of the energy storage industry together through ESA Energy Storage Conference & Expo, working to provide content to Accelerate markets, Connect its members and Educate stakeholders about the power of energy storage. Virtual #ESACon21: April 21-22, 2021; #ESACon21: December 1-3, 2021 - Phoenix, AZ

Energy storage (Brazil) The massive introduction of non-firm energies such as solar and wind in the Brazilian energy matrix brings a new challenge. The need to meet demand when solar and wind energy are not "delivering". There are two main approaches to meeting this challenge. 1st) Let it "roll"; It is the preferred mode of our Brazilian culture.
