The Residential Energy Storage market in Brazil encounters challenges stemming from the initial high costs of energy storage systems and limited awareness among consumers. Despite the potential benefits of increased energy independence and resilience, convincing homeowners to invest in these systems remains a hurdle.

Driven by both market and policy factors, the growth of energy storage is expected to be explosive, creating a strong demand for the industry's supply chain. Once again, the China Electricity Council and the State Grid Corporation of China will collaborate to host Shanghai International Energy Storage Technology Application Expo (ES Shanghai 2024).
