Compared with sensible heat energy storage, latent heat thermal energy storage system (LHTES) has higher energy storage density. However, the low thermal conductivity of PCM is a major obstacle to achieving more efficient LHTES technology. Therefore, this study uses numerical simulation to evaluate the effectiveness of five enhanced heat transfer methods for LHTESs, ...

The World Energy Storage Conference 2023 is an important platform to promote cooperation in the energy storage industry. A total of 63 new energy projects, especially energy storage projects were signed, with a total planned investment of 119.12 billion yuan (about 16.34 billion U.S. dollars).
