

How can Egypt store electricity?

Egypt has been looking at a number of ways to store electricity as part of its ambitions to grow renewable energy capacity to cover 42% of the country's electricity needs by 2030. These include upgrading its power grid and incorporating pumped-storage hydroelectricity stations to help store electricity for future use.

What is a large-scale energy storage project?

The project aims at providing the scientific, technological and policy basis required for the development and implementation of large-scale energy storage in Egypt, enabling increased penetration of renewable energy sources in the Egyptian energy system.

Is Empower preparing a solar investment with multinationals in Egypt?

Empower is currently preparing three solar investments with multinationals operating in Egypt "that are seeking to decarbonize their operations while at the same time securing a competitive electricity tariff over time," said Empower Chief Executive Officer Terje Osmundsen.

Can batteries solve Egypt's Electricity oversupply problem?

Egypt is exploring the potential of energy storage through batteries to combat our electricity oversupply problem: As Egypt continues to suffer from a major oversupply of electricity, the country is in need of new ways to tackle the issue.

Is Egypt a good place to invest in solar energy?

Egypt has plenty of land and high solar yields,"making renewables highly competitive against other sources of energy," the Scatec spokesperson said. But the main limiting factor is the high cost of financing as a result of rising global interest rates, they added.

Is Egypt a good PV market?

Osmundsen said that Egypt is fundamentally an attractive PV market but the country's current economic crisis, including a severe currency depreciation, is making foreign investment difficult.
