

Capital portable power storage power station

How much power does a portable power station hold?

On the small end, portable power stations hold around 300 Wh (like the little Goal Zero Yeti 300, our Best Budget pick). These little ones are generally smaller than a lunch box and good for tasks like recharging laptops and speakers, LED lighting, and small fans.

What can a portable power station Power?

A portable power station can power your phone, computer, or even your refrigerator. We researched the best portable power stations to help you decide which is right for you.

Where can I buy a portable power station?

There are plenty of other portable power station options available on the market. Most are available at stores like Lowe's, Home Depot, and others, and I recommend checking out these models. ZDNET saves you time and money by delivering the best products and tech deals to your inbox every week.

What are the best portable power stations for home offices?

We like this unit for home offices because it can be set up under or beside a desk, and it has a built-in handle that makes it easy to transport the 32-pound device. The EcoFlow Delta 2 Max is another example of a feature-packed and versatile portable power station that can be used indoors or outdoors.

What ports does a portable power station have?

Ports: While you will find certain ports across the board with portable power stations, from AC outlets to USB-A, it is crucial to check the maximum charging rate and supported charging standards to avoid disappointment. You might find USB-C ports, car ports, barrel ports, and maybe inputs for solar, but assume nothing.

What is the best budget portable power station?

Ecoflow River 2 Pro: A previous title holder for "best budget portable power station," this is still a great pick for anyone looking for affordable power options. It charges fully in just over 1 hour and accesses a respectable 82.6% of the battery's 768Wh stated capacity.
