

# Commercial solar panel

Commercial and industrial solar panels are often larger than residential panels. The average solar panel size in a commercial application is approximately 78 inches by 39 inches with 96 cells. These 96-cell panels have an average panel output of 500 watts, making them more suitable for large-scale energy needs.

At Freedom Solar, we're more than a commercial solar panel installer. We offer full end-to-end solar solutions, battery energy storage systems (BESS), and complete project management from start to finish, across all 48 contiguous states in the United States.
