You can optimize your stored energy to charge your electric vehicle with clean energy during the day, at night or during an outage. Adjust your system settings to charge exclusively with excess solar energy, or share your electric vehicle's battery power with your home using Powershare to extend your home's backup support during an outage.

Being able to store your home's energy provides you with a brilliant new source of power. GM Energy PowerBank seamlessly pulls energy from the grid during off-hours for you to use at peak times or during a blackout. And if you have compatible solar panels, it collects power generated during the day to use at night or anytime you see fit.
