

Emergency generators residential

Engineered and built in the U.S.A., the new lineup of home standby generators are engineered to save you money on installation while offering the same reliability and peace of mind you get from all Generac home standby generators.

Your home standby generator is installed outside your home like a central A/C unit and runs on natural gas or liquid propane (LP), depending on what fuel source is available. All home standby solutions are designed to keep you safe, secure and comfortable in an outage.

A Generac standby generator protects your home and gives you peace of mind. When the power fails, you'll be ready. With automatic operation and 24/7/365 support from our Wisconsin headquarters, a Generac backup generator gives you added protection in an increasingly uncertain world.

When your home needs backup power, Cummins whole house generators are the most trusted for reliable, durable, and powerful home standby power. Learn more about how to find the best home generator for your backup power needs.

An automatic standby generator protects you from power failures, restoring power within seconds of an outage, so you can have peace of mind and the power you need. Generac's new Protector[®] Series diesel generators raise the bar for residential and light commercial diesel generators.
