Is there any good information on candlestick charting?

There has been a great deal of cogent information published on candlestick charting both in book form and on the worldwide web. Many of the works, however, are encyclopedic in nature. There are perhaps 100 individual candlesticks and candle patterns that are presented, a daunting amount of information for a trader to learn.

What is a candle stick chart?

The Candle Stick Chart is represented by the CandleStickSeriesView object, which belongs to Financial Series Views (also called Low-High-Open-Close). This view is used to show the variation in the price of stock over the course of a day.

How do candlestick patterns work?

Candlestick patterns can be used to provide entry and exit signals in as little as a single candlestick. Candlesticks display the open, high, low, and close of a security's price for a specific timeframe. One or more candlesticks are often combined to create patterns that traders use as a buy or sell signal.

How do candlestick patterns confirm a trend reversal?

Candlestick patterns are often coupled with other forms of technical analysis for confirmation. For example, if a hammer pattern forms at a significant support level, the hammer pattern confirmed the trend reversal at support.

What is a candlestick pattern?

A candlestick is a visual display of the open, high, low, and close of a security's price for a specific timeframe. Candlestick patterns can be used to provide entry and exit signals in as little as a single candlestick. Candlesticks display the open, high, low, and close of a security's price for a specific timeframe.

What is a neutral candle pattern?

Neutral patterns suggest indecision, a pause in the preceding trend, or nondirectional price action. Single candle neutral pattern that signals indecision. The open and close of the candle are the same, with an upper and lower wick. Considered an important candle for trend reversals. Single candle neutral pattern.
