Aim for 50-75% Load: Plan your device usage so the total load falls within this range for maximum efficiency. For example, if you have a 2000W inverter, aim to run devices that total between 1000W and 1500W. Avoid Low Loads: Running only low-power devices (e.g., phone chargers) on a large inverter is inefficient. Use direct 12V DC chargers for smaller loads when possible to ...
