

The conference focuses on new energy storage technologies and applications (such as solid-state batteries, sodium-ion batteries, flow batteries, compressed-air energy storage, pumped ...

During 2024 and 2025, falling equipment prices and supportive policies will accelerate the development of U.S. energy storage market. However, C&I energy storage sees limited growth and requires more time to yield progress, given its premature market mechanism and suppliers failing to introduce effective profit models to manufacturers.

Launching on the 12th & 13th March 2025 at the NEC, The Energy Storage Show will feature battery and energy storage systems for large-scale applications ranging from utility scale systems through to onsite and domestic technologies. Along with the full systems, the show will feature the components, services and technology to develop, install, operate and maintain them.

Key Elements and Highlights. Showcase Innovations: Providing a platform for showcasing the latest sustainable energy technologies, including solar, wind, bio-energy, hydro-power, and energy storage solutions including Lead Acid and Li ion Battery. Networking Opportunities: Facilitate connections between industry players, including startups, established companies, ...

At EESA China International Energy Storage Expo (EESA EXPO), Asia's premier energy storage exhibition, the road ahead is paved with countless opportunities.
