Are solar panels a good investment in Missouri?

Solar panel systems in Missouri are expensive, but incentives from the state and federal governments can help you reduce the upfront cost. Between the federal tax credit and other state-specific incentives, you can save thousands on solar panels, making them well worth the investment.

What are the best solar panel incentives in Missouri?

If you connect your solar panel system to the grid, you can benefit from net metering, one of the best solar panel incentives available in Missouri. With net metering, you earn credits when you send excess electricity from your solar panels to the grid.

Does Missouri offer a solar rebate or tax credit?

While Missouri does not offer any tax breaks, it does have several solar rebate incentives. You can also apply for a low-interest solar loan if you cannot pay for your system out-of-pocket. Several local power companies in Missouri offer solar rebate programs for their customers.

Is Missouri a good place to go solar?

Although Missouri does not have a property tax exemption for solar systems, it offers other incentives to make going solar more affordable. Plenty of other incentives make Missouri an attractive place for solar. As energy costs increase, so will your savings from a home solar system and other clean energy initiatives.

Is it possible to get a solar loan in Missouri?

Yes, PACE financing provides accessible solar loans to homeowners in Missouri. The passage further explains that it's a good alternative to lease options.

According to James Owen, executive director of Renew Missouri, Missouri's laws around solar panels have changed little in more than a decade. Owen told CNET, "It hasn't really created a robust industry here, but it is an industry that is moving in the right direction.

Energy exported to Evergy and power supplied by Evergy is monitored through a bi-directional meter; Through one-for-one net metering, exported energy is used to offset an equal amount of power supplied by Evergy during the billing period. Excess energy is credited at our avoided cost
