

How much does a solar inverter cost?

For an average-sized installation, inverters typically range between \$1000 and \$1500. That cost can go up quickly though as the installation gets bigger. Each year, the National Renewable Energy Lab performs a cost benchmark of the solar industry, looking at average installation costs, inverter and panel costs, and a host of other related topics.

Which solar inverter should I buy?

Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2024.

What is a solar power inverter?

A solar power inverter's primary purpose is to transform the DC (direct current) electricity generated by solar panels into usable AC (alternating current) electricity for your home. Because of this, you can also think of a solar inverter as a solar "converter."

How do I choose the right solar inverter type?

There are two categories to consider when deciding on the right solar inverter type: the solar inverter technology, and the type of solar power system the inverter is for. String inverter: A string inverter is a single, standalone unit that converts power from a whole string (or strings) of solar panels.

What is solar inverter efficiency?

Inverter efficiency is a measure of how efficient your inverter is at converting your solar panels' DC electricity into AC electricity to power your home. The higher your inverter's efficiency, the less electricity you lose over time. It's important to note that an inverter's efficiency will never be 100%.

What wattage should a solar inverter be?

Your inverter's wattage should match the wattage of your solar panel system. If you have a 7,000-watt solar panel system, your inverter size should be at least 7,000 watts. When it comes to solar products, you'll likely see kilowatts used as a unit of energy measurement more than watts. That's fine; the same rule still applies with kW.
