Nature Power Solar Panels take the sun's energy and turns it into electric current. These solar panels are high efficiency 12-Volt solar panels featuring sturdy aluminum frames and high transparency tempered glass tops. They have a scratch resistant and anti-reflective coating to help keep the solar panel in good shape for many years.

What are the differences between the various solar panel types? Solar panels come in various types, each with distinct characteristics. Monocrystalline panels, known for their high efficiency and sleek black appearance, are ideal for limited spaces. Polycrystalline panels offer a balance of performance and cost, recognizable by their blue hue and slightly lower efficiency.
