

Idaho power solar changes

Will Idaho Power change its solar rate?

Idaho Power is proposing the same solar rate changes for its Oregon customer base to the Oregon Public Utilities Commission. In an initial procedural decision, Oregon rejected the plan but Idaho Power will continue pushing. Climate Action Coalition of the Wood River Valley, and Empowered Solar.

Does Idaho Power support solar energy?

Idaho Power supports solar energy and fair prices for all. Customers who install their own generation sources -- usually solar, but also wind, hydropower, geothermal or fuel cells -- can offset some or all of their energy needs.

What is Idaho Power's new solar compensation rate?

The vote came after years of public, expert and environmental community pushback and is an approval of Idaho Power's own internally determined rate calculation. The Sierra Club estimates that the new compensation rate will be 5.96-cents/kWh (down from the already low 8.8-cents/kWh). An install in Idaho by EGT Solar.

Is Idaho Power undervaluing rooftop solar?

Idaho Power proposed cutting solar rates based on an internally produced "Value of Distributed Energy Resources Study." Sierra Club and other environmental groups hired an independent analyst that concluded Idaho Power was severely undervaluing rooftop solar's value by using selective data.

Will rooftop solar reduce green energy use in Boise?

According to Noah Rott, spokesman for an environmental advocacy group, "Installing rooftop solar will reduce the amount of green energy on the grid," which goes against federal, state, and Idaho Power's goals of increasing renewable energy use. Boise State Public Radio reported this.

Will Idaho's new solar credit make solar panels unreachable?

An install in Idaho by EGT Solar. The Dec. 29 approval of the rooftop solar credit system will make the cost of new solar panels unreachable for most Idahoans, potentially crushing local rooftop solar businesses in favor of corporate solar ownership.

It's an exciting time to work for Idaho Power. Our work plays a critical role in communities we serve across Idaho and Oregon, and we're working hard to safely provide our customers with the reliable, affordable, clean energy they depend on.

The number of Idaho Power customers with residential solar power has increased from nearly 1,000 in the Idaho Power system in 2016 to more than 13,000 in 2022, according to a company report. Rodriguez said the rise in Idaho homeowners with solar panels is largely driven by the decrease in costs associated with installing solar.
