

Is pine sol safe for septic systems

Is Pine Sol bad for a septic tank?

Bacteria in the septic tank typically need a pH of 6.5-7.5 to thrive. However, depending on the product, Pine Sol will either have a pH of 3-4 or 10-11. Either of these is still bad for the septic tank bacteria. A septic tank that doesn't have the proper pH value will fail, which will lead to clogs and blockages in the drain field.
