

Is yunwo energy storage legal

Are there legal issues relating to energy storage?

As set out above, there are a wide variety of energy storage technologies and applications available. As a result there are a number of legal issues to consider, although the relative importance of such issues will be informed by the specific energy storage project design. revenue stream requirements e.g. double circuit connection.

Does the new EU legal framework affect the value of energy storage?

Analysis of impact of the new EU legal framework on the value of energy storage. Interdisciplinary methodology using legal analysis, expert interviews and modelling. Study of various storage technologies and applications across 12 EU countries. New legal regime fits for behind-the-meter batteries, which can become widespread.

Does energy storage need a regulatory framework?

Our review demonstrates that no jurisdiction currently provides a comprehensive regulatory framework for energy storage, with the majority of jurisdictions currently allowing storage to be defined as "generation" for the purposes of licensing and other regulatory requirements.

Is there a legal framework for energy storage investment and innovation?

Despite this promising outlook, the lack of an enabling legal framework was identified as a prime barrier to energy storage investment and innovation (Parag and Sovacool, 2016; Castagneto Gissey et al., 2018; Gährs and Knoefel, 2020; Schmitt and Sanford, 2018; Crossley, 2013; Schreiber, 2020; Stephan et al., 2016).

Is energy storage a new technology?

Energy storage is not new- the scale of pumped hydro deployment across the globe is significant. The new technologies, however, are technologies that are frequently quick to build out, often have fast response times and have a range of potential applications.

Should energy storage be supported?

Furthermore, the 2018 Renewable Energy Directive (hereinafter 2018 RES-Directive) emphasises in its recital 60 that energy storage should be supported to facilitate the integration of renewable energy technologies (Directive, 2018).
