

Jayco power management system

Control your van features from the tablet via an app. Turn on the water pump and the lights, monitor your power source, battery's state of charge, and water tanks, and operate slideouts using...

Hi Forum, I recently purchased a 2000 model Jayco Pop Top. Yesterday went to replace the radio but there was no power getting to the old one. So lifted the seat and found 2 x deep cell batteries and an electrical box that I have now come to know as a Centurion 3000 power management system.

Elevate your RV experience with the BMPRO J35B-L Power Management System. Exclusively crafted for Jayco vehicles, this intelligent battery management system is versatile enough to charge various battery types, including 12V sealed lead-acid (SLA) batteries, valve-regulated lead-acid batteries (VRLA), absorbed glass mat (AGM) and gel batteries.

Jayco launched its new Overlander EXT Modular Power Management package, which the company said sets the standard for factory installed systems. The original Overlander II package was launched by Jayco as an option for model year 2021, and the new Overlander EXT package is a considerable step up in power, components and flexibility.

PM300-BTJ and PM335J-NODE are power management systems designed for use in caravans or motor homes. These systems allow for easy installation and a user-friendly interface. Both PM300-BTJ and PM335J-NODE systems come with the same PM335J transformer unit, which the circuits in the caravan or motor home are centrally wired to.
