

# Ladwp energy storage incentive program

Why does LADWP need to invest in energy storage?

According to LADWP, these locations represent where storage is most likely to be necessary to regulate reserves and mitigate potential load shedding. Energy storage is a versatile resource that can provide value to LADWP's system by performing multiple applications.

Where will LADWP provide distributed energy?

LADWP will provide distributed energy in locations most likely to occur in the Los Angeles Power System service area, including fifty (50) 4.8kV feeders and twenty (20) 34.5kV circuits. LADWP will provide load profile data for the last three years for these respective circuits.

Does LADWP offer incentives for new energy efficient cooking equipment?

LADWP offers incentives for new energy efficient cooking and cooking process equipment. Under this program your business may qualify for a financial incentive when you purchase equipment such as ovens, griddles, steam cookers, holding cabinets, glass and solid door refrigerators/freezers, and icemakers for your business.

Should LADWP procurement processes be increased?

The procurement of these significant capital investments for securing ReESS in the LADWP bulk power system may lead to a rate increase process for LADWP. On the other hand, it may add complexity to the day to day operation of the LADWP bulk power system.

Our first program of this nature is CES2G, or Commercial Energy Storage to Grid pilot program, the nation's first municipal utility vehicle-to-grid (V2G) and energy storage-to-grid program. We will continue to develop customer-facing programs to help transform the City of Los Angeles into one of the leading energy storage cities in the world.

The Los Angeles Department of Water and Power (LADWP), the nation's largest municipal utility, tapped CSE to administer its Solar Incentive Program that offered rebates to homeowners and businesses for photovoltaic systems.

The CPUC's Self-Generation Incentive Program (SGIP) provides incentives to support existing, new, and emerging distributed energy resources. ... internal combustion engines, microturbines, gas turbines, fuel cells, and advanced energy storage systems. If you are a customer interested in participating in SGIP, ...

LADWP's portfolio of equity programs needs deeper outreach, more funding, broader cross-sector collaboration, and new ideas. ... A vehicle for upcoming state and federal energy storage incentives, such as clean energy and climate resilience funding from the 2021 Infrastructure Investment and Jobs Act, the expanded

Energy Storage System (ESS) may be added to the PV System for customers who ... Local solar is an important component of the LADWP's renewable energy programs and will help the LADWP meet its renewable energy targets, while reducing ... B. Customers that are currently enrolled with the Solar Incentive Program (SIP) or

Its massive public utility company, the Los Angeles Department of Water and Power (LADWP) had already implemented its own Solar Incentive Program (SIP) all the way back in 2000. The California Solar Initiative supercharged the LADWP's program by handing the utility \$313 million to funnel to its residents and businesses.

View real-time data related to LADWP's clean energy generation. ... also known as the Commercial Energy Storage to Grid pilot program, is the nation's first municipal utility vehicle-to-grid (V2G) and energy storage-to-grid program. ... The Commercial Lighting Incentive Program provides rebates on the installation of newly purchased and ...

August 25, 2017. The Los Angeles Department of Water and Power (LADWP) recognizes the important role of customer-owned energy storage systems, including those paired with rooftop solar systems, that are capable of both storing and discharging energy to allow our customers to better manage their electricity use.

LADWP continues working aggressively to expand Los Angeles' supply of renewable resources, including wind, solar, geothermal, biomass, and small hydroelectric power, along with other clean energy solutions such as energy storage, energy efficiency, demand response programs and distributed energy resources.

Projects not completed within 12 months of LADWP approval may be cancelled and reserved funds returned to the program fund. LADWP is unable to guarantee estimated energy savings amounts. LADWP will provide energy savings and incentive calculations only upon completion of the project and verification of the energy savings.
