offers a dynamic platform for exhibitors and visitors alike to engage in networking, matchmaking, and gaining industry insights.

During 2024 and 2025, falling equipment prices and supportive policies will accelerate the development of U.S. energy storage market. However, C&I energy storage sees limited growth and requires more time to yield progress, given its premature market mechanism and suppliers failing to introduce effective profit models to manufacturers.

Energy and climate-related policies have been accelerated by both state and federal governments, and for many companies the time feels right to invest in energy storage. This event gathers together investors, developers, IPPs, grid operators, policymakers, utilities, energy buyers, service providers, consultancies and technology providers under one roof.
