What Size Storage Heater Do I Need? Rule of thumb for storage heater sizing: Calculate the size of the room in cubic feet by multiplying its height, width, and length together. For example, if a room is 8 feet high x 12 feet wide x 15 feet long, this would be 1,440 cubic feet. For storage heaters, we recommend 4 - 5 watts per cubic foot.

improvement of the country's energy efficiency (EE) and RE capacity through the National Energy Efficiency Action Plan (NEEAP) and the National Renewable Energy Action Plan (NREAP), respectively. NREAP pledges to increase renewable energy technology adoption in Lebanon to reach 12% of all energy demand by 2020, it focuses on three main ...
