How will Italy support energy storage?

Italy is one of Europe's fastest growing energy storage markets and recently introduced mechanisms to support this nascent sector. To meet its decarbonisation goals, it set out the need to build 9 GW of new grid-scale energy storage and upped its renewables targets with the aim of having 65% of electricity from green energy by 2030*.

Is Italy a good place to invest in energy storage?

Italy is an incredibly interesting and fast-growing market for renewables and there's significant untapped potential in the energy storage sector. "Big batteries like the ones we're developing with this new joint venture make the most of when it's sunny and windy by storing abundant green energy and releasing it back into the grid when it's needed.

Which projects have a battery energy storage system been implemented?

Internationally, we have already implemented major projects such as the Tynemouth stand-alone storage system in the UK and the La Caba; a photovoltaic plant in Chile, which is equipped with a Battery Energy Storage System that ensures its efficiency and stability.
