

What are lithium stocks?

Lithium stocks are commodity stocks that have principal interests in the mining, refining and distribution of lithium. The companies included under the umbrella of lithium stocks may be involved in the production of other metals and minerals, but lithium will be included in their portfolio.

Should you buy battery stocks in 2024?

The International Energy Agency predicts a tenfold increase in battery demand for electric vehicles over the next decade. Battery stocks haven't fared well for much of 2024, but a big rally has put them back in the spotlight. The Global X Lithium & Battery Tech ETF (ticker: LIT) gained more than 20% in September.

Will a downward trend in Lithium prices create buying opportunities?

A downward trend in lithium prices may be creating buying opportunities. Some lithium mining companies could be bargains at the moment, but investors will need to choose strong companies that will be able to weather the downtrend in lithium prices.

Are lithium stocks on a rocky road?

For a clique latched to the sleek EV market, lithium stocks sure have been on a rocky road. After a few years when soaring EV sales had investors prizing all things lithium, lithium prices dropped more than 80% from their 2022 peaks. Shares of lithium mining companies fell with them.

Will a lithium crisis lead to an opportunity for lithium stocks?

Crisis will again lead to opportunity for lithium stocks. Sure, crumbling demand for electric vehicles, fears of oversupply, and stalling lithium demand in China have put a recent dent in lithium prices, but don't let that chase you away. Instead, use the weakness as an opportunity to buy.

Are lithium stocks a risky investment?

Finance, as of May 30, 2024. Lithium stocks, like all commodity stocks, are closely linked to the supply and demand trends in the underlying materials they produce. All investing generally carries risk, and miners like this have specific risks based on their business model. That said, we've tried to highlight leaders in the sector based on:

If the environment firms up for lithium stocks, the companies currently trading at rock-bottom prices could bounce back. Forbes Advisor has identified seven of the best lithium stocks...
