Short Description: ADR-30000 Capacitor Discharge Energy Storage Spot Projection Welding Machine The principle of the ADR-30000 capacitor discharge spot welder is to charge and store a group of high-capacity capacitors through a small transformer in advance, and then discharge and weld the welding parts through a high-power welding resistance transformer.

What is the capacitor energy storage pulse welding machine? The Glitter newly designed and patented 801/811 series product are equipped with multiple super capacitors for energy storage and power supply for pulse welding. Comparing to the traditional AC transformer spot welders, it is more powerful, stable and portable.

Recently, I built this Semi automatic spot welding machine without the Arduino and it's working just perfectly. With this spot welding machine, I made 4S and 3S lithium Ion battery packs. Right now, this 100uF capacitor controls the ON time of the transformer and it gives me enough time to weld the nickel-plated strip to the lithium Ion Battery.
