

Makita 12v max lithium ion battery

Makita tools are designed to work with specific battery voltages, and using a battery with a higher voltage than what is specified can overload the tool and cause damage. Additionally, 40-volt batteries are much larger and heavier than 18-volt batteries, and they won't fit in an 18-volt tool's battery compartment.

12 V max Lithium-Ion battery is more compact and lighter than the 9.6V Ni-MH battery. FAST Shipping | FREE Shipping over \$199. ... The Makita 12 Volt Lithium-Ion battery works well with 10.8 Volt and 12 Volt cordless tools and is compatible with Makita chargers DC10WA and DC10WB. Compact and lightweight design makes it easy to use and operate.

You might be tempted to use a different battery on your Makita tool than what is specified in the manual or on the compatibility chart. However, it's not recommended to do so. Different batteries have different voltages and power outputs, which can cause damage to your tool or even create a safety hazard.

The 12V max CXT 4.0Ah battery (and 2.0Ah battery, sold separately) are at the heart of the expanding Makita 12V max CXT tool series, combining performance with superior ergonomics in a compact size.
