

# Maryland solar panel incentives

Local governments and non-profits can apply for competitive grants to enable solar PV projects that benefit Marylanders experiencing low income, or are members of Maryland's overburdened and underserved communities.

**Program Purpose:** The Maryland Energy Administration (MEA) FY25 Maryland Solar Access Program will be provided to help eligible Maryland residents install solar photovoltaic (PV) systems to power their homes with clean, affordable, and sustainable energy.

Maryland has some of the most generous solar incentives in the country, with big rebates, clean-energy credits you can sell for cash, and tax exemptions. And with the relatively high cost of grid electricity, going solar in Maryland adds up to big savings. See how much solar costs in Maryland.

The Maryland Solar Access program will provide up to \$7,500 per eligible household, based on an incentive of \$750 per kilowatt of direct current solar capacity. The levels of the individual incentive and overall investment align closely with the recommendations of the 2023 Maryland Task Force to Study Solar Incentives.

Several incentives are currently available to encourage customers to install solar panels on their homes, including tax credits, rebates, grants, and other incentive programs. These incentives can greatly reduce the overall costs of installing solar panels.

The Federal Residential Renewable Energy Tax Credit allows taxpayers to claim a credit of 30% of qualified expenditures for a solar energy system that serves a residence. Systems must be placed in service by December 31, 2019. Incentives are less after 2019.

See how much you can save on home solar panels through rebates & tax credits in Maryland. Here's the full list of federal, state and utility incentives that apply where you live...

4 days ago; FOR IMMEDIATE RELEASE. Contact: Tim Zink | 443-758-7344. Maryland Energy Administration's new grant program focuses on expanding solar power on buildings that benefit low- to moderate-income Marylanders, overburdened neighborhoods. BALTIMORE - The Maryland Energy Administration today announced the opening of the new Fiscal Year 2025 ...
