

A Masters in Renewable Energy is a programme designed to equip students with the skills and knowledge to address the world's increasing demand for clean and sustainable energy. These programmes provides an in-depth study of various renewable energy technologies, including solar, wind, hydro, geothermal, and biomass.

The Master Track offers education in the modern power systems field, emphasizing Renewable Energy Systems and Automatic Control. It trains students to tackle the current and future challenges of smart power systems in a new way.

Dr. Erich Schienke's research and teaching interests are in the areas of energy policy, renewable energy systems design and implementation, ethical dimensions of renewable energy and sustainability systems, sustainability indicators, ESG, and workforce requirements needed to meet the demands of the rapidly growing renewable energy industry.

REM students get acquainted with renewable energy management-related topics such as bioenergy and geothermal energy, solar energy, wind energy and hydropower, energy management, and more. It is possible to add elective modules from the MSc programmes in Integrated Water Resource Management and Natural Resources Management.

The Master programme Renewable Energy Systems (RES) aims at providing graduates with the skills required to successfully plan, develop and control energy systems. Graduates will be ...

New examination regulations will come into force for the Master of Sustainable Energy Technology in the winter semester 2023/24. Information and documents will be made available shortly. ... German companies have a great deal of experience with renewable energy sources due to the many years of state-funded implementation of the energy ...

Renewable Energy Master of Engineering (M. Eng.) Terms. 3 or 4 semesters, full-time. ECTS-Credit Points. 90 or 120 . Program start. Summer and winter semester. Application deadlines. applicants with German credentials: Sept 1 for the winter semester/Mar 1 for the summer semester applicants with international credentials: Apr 15 for the winter ...
