Does Steffes offer electric thermal storage heating?

Enjoy exceptionally comfortable and reliable warmth in every room, every hour of the day. Whether you're looking to heat a single room, your entire home, or a commercial property, Steffes offers several products that utilize our efficient Electric Thermal Storage heating system.

What is a Steffes comfort plus ducted air furnace?

The Steffes Comfort Plus Forced Air Furnace (4100 Series) is a ducted heating system designed to stand alone or work in conjunction with a heat pump for increased efficiency. All Steffes Comfort Plus Forced Air Furnaces are equipped with a variable speed blower to ensure consistent, even temperature output to meet your comfort requirements.

Does a Steffes comfort plus hydronic furnace have a heat pump?

The Steffes Comfort Plus Hydronic Furnace is perfect for radiant floor systems, baseboard radiation and even forced-air systems. And all Comfort Plus furnaces can be equipped with a heat pump system for even greater efficiency. When interfaced to a heat pump, this furnace offers one of the most economical heating and cooling options available.

During off-peak hours, when electricity costs and energy usage rates are low, the Steffes Hydronic furnace converts electricity into heat and stores it in specially-designed ceramic bricks located inside the unit. Through the use of a heat exchanger, this stored heat is transferred to water ...

For upgrading older storage heaters like the Dimplex XLS or Creda TSR is the Elnur ECOSSH is the top choice. It's the only modern storage heater model that can operate on a single power supply. ... please give ...

When storage heaters are set up correctly, and because they use cheap night rate electricity, the running cost per kW of heat is much cheaper than direct electric heaters. Modern storage heaters have full controllability over the time and temperature settings for the room and provide the same room comfort levels as direct electric heaters.

Off-peak storage heaters (also called off-peak heat banks and electric thermal storage, or ETS) take advantage of dual-tariff electricity meters by making the best use of the cheaper electricity rates. These heaters store heat when electricity is at its cheapest, then release it into your home when you need it the most. This is normally done using forced air.

Our 2100 Series room units are ideal for retrofitting electric baseboard-heated rooms, supplementing an existing heating system or heating a new addition to your home or business. Unlike traditional electric heaters, Steffes ETS room heating units convert electricity to heat during off-peak hours, when the demand and price of electricity is lower.

Central heating installation cost for a two-bed bungalow. For a two-bed bungalow, you'd be spending around £5,200 to install gas central heating. A gas boiler will cost around £1,000 - £1,800 for supply and installation.. For the radiators, you could expect to spend around £900+ on parts and labour and pipework around £250+ for material and installation.

Electric furnaces are ideal for small spaces without external air ducts, warmer climates that need less heating,

Muscat electric heat storage furnace quote

or homeowners without access to natural gas. An electric furnace lasts 20 to 30 years--5 years longer than gas systems. Electric furnaces cost less to replace than gas furnaces, but cost 2 to 4 times as much to run.
