

Portable generator for backup power

Does Generac offer a backup generator?

Offering the full suite of Generac's gas-powered generators and rechargeable backup batteries, Canter Power Systems has been providing backup power options for 70 years and is now the largest full-service generator installer in the nation. These products or services have not been evaluated by CNET's editorial staff.

What is a portable generator?

These generators, sometimes called backup generators, are used to provide temporary power when and where it is needed. Portable is a relative term; some are more portable than others. While the smallest models can be picked up and carried, most have wheels and a handle to make transport easier.

Why do you need a portable generator?

A portable generator is useful in a wide variety of situations. For camping, it can help keep your RV or van conversion fully juiced and your devices topped off. At home, it's easy to move into place when the utility power goes out. It provides the electricity necessary to use power tools at off-grid worksites.

What is the best portable generator?

To help you find the best option for you, we looked at over 100 portable generator models and analyzed hundreds of customer and professional reviews. For most homeowners, our top pick is the Westinghouse Outdoor Power Equipment model, which provides a heavy-duty design with a high wattage level and the ability to charge multiple devices at once.

Can a portable generator back up a refrigerator?

Portable generators vary in size and the amount of power they can provide, but typically portable generators can only back up specific, high-priority appliances like refrigerators, freezers and heaters or air conditioners. Generators that back up the entirety of your home will typically be more expensive and require professional installation.

What is the best portable power station for backup?

Anker Solix F1200 (1,229Wh): This unit was previously known as the PowerHouse 757 from Anker, and was also CNET's previous pick for "best portable power station for backup." Its UPS mode was one of the earlier units to boast "less than 20ms" switchover time in the event of a power outage. It's also currently \$500 off on Anker's site.
