

Portable power station review

What are the best portable power stations?

To help you decide, I tested the efficiency, in a variety of scenarios, of the best portable power stations from Jackery, EcoFlow, Anker, Goal Zero, Bluetti, Dakota Lithium, Lion Energy, Vtoman, and Ugreen. What to Know Before Purchasing a Portable Power Station

What is a portable power station?

Portable power stations are basically large batteries in protective boxes, with AC outlets and other charging ports built in. They're generally much bigger, heavier, more powerful, and more rugged than power banks and portable laptop chargers.

How much power does a portable power station hold?

On the small end, portable power stations hold around 300 Wh (like the little Goal Zero Yeti 300, our Best Budget pick). These little ones are generally smaller than a lunch box and good for tasks like recharging laptops and speakers, LED lighting, and small fans.

Should you buy a portable power station?

Portable power stations have enough bells and whistles to justify adding one to your everyday life as a backup in emergencies. They can also be an inexpensive stand-in for generators when you need to keep your necessities up and running during an emergency like a tornado or general outage.

How do I choose a portable power station?

One of the most important factors in choosing a portable power station is the amount of energy it can store, known as its energy potential. The energy potential of a battery depends on a number of factors, including battery chemistry, size, and age.

Should you buy a lesser-known portable power station?

If you choose to go with a lesser-known brand to save money, pay careful attention to the product specifications and user reviews for these products. Many portable power stations look the same on the outside but use very different components internally.

The S2000 PRO is ALLPOWERS' newest portable power station, but the brand makes a range of power stations with wattage as low as 200W for camping trips and cookouts. Along with these, you'll find a hefty supply of solar panels from 60W-400W as well as backpack size minis and generator bundles that combine both power station and solar panels.

The Mega 1 is a new portable power station and solar generator from Oupes. Equipped with numerous ports, fast charging, and a powerful inverter, Oupes aims to attract both travelers and homeowners seeking a reliable backup power source for outages.

Portable power station review

The Bluetti AC70 is a compact portable power station for the home, home office, or van. Boasting a range of AC and DC inputs and outputs, this unit offers all-round general use and meeting most needs.

6 days ago; The ALLPOWERS Portable Power Station can be charged by solar power. And, unlike the other power stations featured on this list, it comes with the solar panels included. The solar panel is 100 W, providing sustainable and affordable energy.

Bluetti is a small business that makes electrical products, and their small portable power stations are among the best. Last year, the brand released a new modular system that can be used as an emergency backup system for the home or business. The system includes two products, a portable power station and a 500W inverter.
