Why is Qatar Airways a CeIV lithium battery certified airline?

Qatar Airways has become the second airline in the world to become IATA CEIV Lithium Battery certified and Qatar Aviation Services is the first ground handling company to be certified globally. The certification aims to improve safety in handling and transportation of lithium batteries throughout the supply chain.

Can a lithium battery be transported on Qatar Airways?

Standalone lithium batteries are allowed only with prior approval from QRDG team. COMAT may be transported despite QR imposed embargoes with prior approval from QRDG team. Your local Qatar Airways Cargo office is happy to advise you on all dangerous goods questions and escalate requests to QRDG team when necessary.

Which airline has a lithium battery certification?

Doha: Qatar Airways has become the second airline in the world to become IATA CEIV Lithium Battery certified and Qatar Aviation Services is the first ground handling company to be certified globally. The certification aims to improve safety in handling and transportation of lithium batteries throughout the supply chain.

Can lithium batteries improve air transport safety?

As a global network carrier and integrated group of aviation businesses the issues relate to both Qatar Airways and Qatar Airways Cargo principally, therefore driving greater awareness of the handling of Lithium batteries will help improve safety in the air transport industry.

What if a lithium battery is removed from a plane?

If the watt-hour rating (Wh) exceeds 100, prior approval from Qatar Airways is required. The removed lithium battery must be carried on board by the passenger and must remain inside carry-on baggage. All removed batteries must be properly packed in order to prevent short-circuiting or damage.

Can a lithium battery be carried by air?

Whether a lithium battery can be carried by air or not depends on its configuration and either watt-hour (Wh) rating, if it is rechargeable, or lithium content (LC), if it is non-rechargeable. Check the following table to find out if your battery can be carried in your baggage. Watt-Hour rating (Wh) or (Li content) Configuration  
Hand baggage

Qatar Airways has become the second airline in the world to become IATA CEIV Lithium Battery certified and Qatar Aviation Services is the first ground handling company to ...

The reason these are treated cautiously is because they can catch fire if the lithium-ion battery cell charges too quickly or becomes damaged, and battery fires spread fast. ADVERTISEMENT
