

Ring camera not recognizing solar panel

Why does my ring camera not recognize my solar panel?

If your Ring camera doesn't recognize your Ring solar panel, it's likely the result of improper installation and set-up. One very common cause of this issue is when users choose the wrong device during the installation process. During installation, your Ring app will ask you to add a new device.

Why is my solar device not connected in the ring app?

You may see the solar device's status as "Not Connected" in the Ring app when your battery is over a 90% charge, and this is normal. Your Solar Charger or Solar Panel will only show as connected in the Ring app when it has stored power.

Can a ring camera connect to a solar panel?

If the battery level is at 90% or higher, the solar panel won't provide any additional charging. Just use the device as usual to drain the battery before checking the solar panel status again. Unfortunately, not every Ring device can link up to a solar panel. So, it's crucial to make sure your camera is compatible with one.

How do I know if my solar panel is connected?

Typically, when you connect a solar panel to your Ring device and the solar panel is successfully installed, the Ring app should reflect that. Under Device Health in your Ring app, the camera's solar status should say Connected.

Why is my ring camera not working?

One of the most likely reasons is that your Ring camera doesn't have batteries. This would happen both if the camera doesn't come with any batteries or if the camera's batteries haven't been placed in the device. Your Ring solar panels usually don't have batteries of their own.

Why is my ring camera not charging?

A few things can prevent your Ring solar panel from charging your Ring camera. One of the most likely reasons is that your Ring camera doesn't have batteries. This would happen both if the camera doesn't come with any batteries or if the camera's batteries haven't been placed in the device.
