New install and everything works good. I attempted to test AC generator and the inverter will not qualify it. I let the generator run for almost a half hour and still not qualifying. I checked the AC settings and they appear correct. The Generator frequency stays at 62 HZ and the voltage on AC2 is 236.6. AC2 L2 voltage is at 118.9 and AC2 L1 voltage is at 118.2 which seems normal. ...
