

Sharp solar company profile

Who is Sharp Solar?

Sharp Solar, a subsidiary of Sharp Electronics, is a solar energy products company owned by Sharp Corporation and based in Osaka, Japan. The company produces thin film modules and mono and poly-crystalline silicon solar cells.

What makes Sharp a great solar company?

For more than 50 years, Sharp's efforts in research and development have led to groundbreaking solar solutions. As a maker of products that consume power, we've always believed we should create power, too. It's all part of our Eco-Positive mission to brighten the lives of people around the world.

Is Sharp a reliable solar power company?

It's been nearly half-century since Sharp's first reliable solar-power solution was first used in a lighthouse. Since then, Sharp has made countless innovations and has grown to a global leader in solar, offering a portfolio of proven solar solutions including monocrystalline, polycrystalline and amorphous silicon.

Why should you choose Sharp Solar power?

We take pride in Sharp's solar power systems, built to our strict quality standards and policies, to provide long-term durability and the confidence that comes with "Japan Quality." We offer megawatt-scale solutions from the design to construction and operation/maintenance of power plants.

Where do Sharp Solar products work?

Sharp's solar products are at work in many areas: on homes, in extreme environments such as lighthouses and artificial satellites, and in megawatt-scale solar power plants around the world. Sharp's track record of over half a century has earned it a solid reputation in the world of solar.

Where are Sharp solar panels made?

Sharp's photovoltaic (PV) modules are used for many applications, from satellites to lighthouses, and industrial applications to residential use. Sharp Solar manufactures PV modules in multiple locations, though it shut down solar panel production at its factories in Wrexham, Wales and Memphis, Tennessee in 2014.
