

Siemens AS 1 Annual report 2018 Technology with a purpose Globally, Siemens has delivered very strong performance, ... a separate company in 2017, as Siemens Gamesa Renewable Energy AS. The operating result for 2018 was NOK -30.3 million, which is an improvement of NOK 142.7 million from

Wind energy plays an indispensable role in our society, and this is evident in the efforts of our Asia-Pacific team. They are rapidly fast laying the groundwork for an expected surge in offshore installations in South Korea in the coming years, even if challenges remain and for now it's onshore that continues to make steady progress.

Italy has held four renewable energy auctions since 2020, which have resulted in a total of 1.3 GW being allocated to wind energy. These auctions should bring Italy closer to its 2030 target of having 18.4 GW of wind power installed, almost double the current 10 GW.

Siemens Gamesa Renewable Energy 7 - 11% Industrial Businesses 11 - 15% Financial Services (ROE after tax) 17 - 22% Margin ranges for Siemens Healthineers and Siemens Gamesa Renewable Energy reflect our expectations as a majority share-holder. In line with common practice in the financial services business,

The portfolio includes conventional and renewable energy technology, such as gas and steam turbines, hybrid power plants operated with hydrogen, and power generators and transformers. Its wind power subsidiary Siemens Gamesa Renewable Energy (SGRE) makes Siemens Energy a global market leader for renewable energies.

Siemens Gamesa Renewable Energy (SGRE) has been selected¹ by NextEra Energy Resources to repower two wind farms in Texas. The newly repowered wind farms are expected to deliver up to 25% more annual energy production, boost reliability and efficiency, and extend service life. The two wind farms currently feature Siemens SWT-2.3-93 model turbines.

The energy production of one Siemens Gamesa 8-MW machine is sufficient to supply approximately 8,000 European households with electricity. The power supplied on Dieppe-Le Tréport and Yeu-Noirmoutier will be sufficient to cover the annual electricity consumption of close to one million households.

Explanations of financial measures used can be found in the Annual Report 2021 of Siemens Energy AG (available at ... More than 50 percent of the portfolio has already been decarbonized.
