Private Businesses Lastly, private businesses within the solar sector may also present investment opportunities.

What is the Invesco solar ETF (fund)?

The Invesco Solar ETF (Fund) is based on the MAC Global Solar Energy Index (Index). The Fund will invest at least 90% of its total assets in the securities, American depositary receipts (ADRs) and global depositary receipts (GDRs) that comprise the Index. The Index is comprised of companies in the solar energy industry.

What is a solar energy fund & how does it work?

The fund holds companies involved with solar energy, EVs, geothermal energy, energy storage, wind energy, and climate tech. It offers some diversification across sectors (industrials at 45%, consumer discretionary at 18%, IT at 15%, materials at 13%, utilities at 7%, energy at 1%, and financials at 1%).

Should you invest in a solar ETF?

Last year, the Trump administration imposed tariffs on imports of solar panels. The ETF can cushion that risk because its holdings are diversified among a number of countries, with nearly half of assets in U.S. companies. Chinese companies account for nearly 25% of the portfolio. Regulations can be a benefit for the industry, too.

What is solar investing?

Solar investing encompasses investments in various aspects of the solar energy supply chain. Perhaps you invest in companies like First Solar (ticker: FSLR) that produce large-scale solar panels. It might even mean investing in a popular company like Tesla (TSLA) that hopes to create smaller solar products for homes.
