

Solar panel pool heater

Are solar panel pool heaters worth it?

You can significantly reduce swimming pool heating costs by installing a solar pool heater. They're cost competitive with both gas and heat pump pool heaters, and they have very low annual operating costs. Actually, solar pool heating is one of the most cost-effective use of solar energy in some climates.

What are the benefits of solar panel pool heaters?

Depending on your pool and location, solar heaters can be a cleaner and cheaper way to keep your pool heated and ready for use. In fact, in most climates, solar pool heaters have lower annual operating costs and are more efficient than traditional heaters.

How does a solar panel pool heater work?

What is a Solar Pool Heater & How Does It Work? Solar pool heaters use the sun's energy to pump water through your pool filter and a series of solar collectors -- devices where the water is warmed in tubular panels by the sun. Once warmed, the water is circulated back into the pool.

How long does a solar panel pool heater last?

According to the Department of Energy, they "typically last longer than gas and heat pump pool heaters." In fact, most properly installed, high quality solar heaters will last up to 20 years. While the payback period for most solar heaters is between 1.5 to 7 years, the actual time will depend on a variety of factors including:

Check out these tips for solar pool heater sizing best practices. FREE Standard Shipping On ALL Orders! * My Account. Track Order. ... You should have half of the pool surface area in solar panels. The surface area of your pool is found when you multiply length by width of your pool. For example, a 16 foot by 32 foot pool would have $16 \times 32 = 512$...

This also makes the installation a lot easier even for first-time solar pool heater owners. Solar panels for this system comes in size of 4'x7.5 feet, 4'x10.5 feet, and 4'x12.5 feet.
