

Solar power chargers

What is the best portable solar charger?

Of the smaller panels, the BigBlue SolarPowa 28 is the top dog of portable solar chargers. The BigBlue is impressively efficient in its charging capabilities and performed the best in all our testing of portable solar panels. This model is the fastest portable model we tested, and it delivers consistent charging even as conditions change.

What is a solar charger?

A solar charger is a device that converts solar power using solar panels into an electric current suitable for charging devices, usually in the form of a USB power port conforming to USB power specifications. Solar chargers typically don't have any power storage of their own, but you can use the charger with a power bank of your choice.

What is a portable solar battery charger?

Whether you're backpacking in the Himalayas or working in your backyard, a portable solar battery charger offers a vast supply of power that you can easily fold up and carry with you.

What are the different types of solar chargers?

Solar chargers tend to fall into three styles: Power banks that have a solar panel attached, stand-alone solar panels for charging outdoors, and a few options that combine these two, pairing larger fold-out panels with a power bank.

Can a portable solar charger charge a smartphone?

Let the sun charge your smartphone, power bank, and most other 5V USB-powered devices with this foldable and efficient portable solar charger. The Blavor 10W portable solar charger is a robust, foldable solar charger that offers just enough juice to keep a typical smartphone topped up.

How many amps can a solar charger charge?

It has two USB-A outputs that can each put out up to three amps, which is enough power to charge any USB device. Roughly the size of a notebook, this solar charger unfolds into three panels and has a zippered case that can easily hold two charging cables, a battery pack, and more.
