What is the solar training network?

**Project Summary:** The Solar Foundation is administering the Solar Training Network, which connects solar workforce trainers, solar employers, and individuals interested in working in the solar industry. This project leverages the experience and expertise of its team members to develop and expand training and workforce capacity building nationwide.

What is the Solar Foundation?

**Project Summary:** The Solar Foundation is the new national administrator for the Solar Ready Vets® program. This project takes an innovative approach to providing transitioning veterans with promising civilian career paths in solar energy while also providing the solar industry with highly qualified and motivated workers.

Why is solar a good investment?

From realtors and appraisers to insurance companies and code officials, having an efficient, well-trained workforce familiar with solar will improve inspection compliance, expedite system permitting, reduce liability and insurance costs, and increase consumer confidence.

**QUALIFICATION OF PROJECT:** First we design a system that will work to cover your electric power needs or most of them, we take into consideration: how many kilowatts hours you use in a year, the tilt and the azimuth of your roof, the solar availability thru the year of your roof, the shade from trees or objects in and around your roof, the year and condition of your roof.

Our solar + storage professional engineers gain valuable experience by working on diverse solar + storage projects and equipment. We specialize in designing commercial solar solutions for different types of rooftops, carports, ground mounts, AC and DC coupled storage systems, modules, racking, inverters, and BOS systems.

Technicians under the National Certification Programme for Rooftop Solar Photovoltaic Installer are only trained and certified through Authorized Training Centres (ATC) in order to ensure overall quality of content, delivery and learning. It is through our ATCs that the vision and objectives of this overall Certification Programme can be achieved.

**Monitor And Maintain Your Solar Panels" Output.** Retrofit your existing system with Performance Monitoring by Freedom Solar Power: Ensure that your panels achieve and maintain optimal output; Real-time data on your system"s solar production; Personal web-based application keeps you in the know on how your solar panels are performing

Solar energy is a significant investment that offers numerous benefits, including reduced electricity bills and a smaller carbon footprint. However, like any other investment, your solar panels require regular maintenance to
