Al Fula Power Station Project is a 540MW oil fired power project. It is located in South Kurdufan, Sudan. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently active. It has been developed in multiple phases. Post completion of construction, the project got commissioned in 2010.

During the day, power is in demand and electricity prices are high. At night, power is not in demand and electricity prices are low. Pumped storage power plants purchase power at night to pump water up to the upper reservoir, they then generate power and sell it back to the grid during the day, when the demand -and price- is higher. Example 1

Our company, JEDCO, started electricity distribution operations on November 21, 2019, after the Ezra power plant was commissioned by His Excellency General Salva Kiir Mayardit, the President of the Republic of South Sudan. Since then, ...
