

Stihl lithium battery

A STIHL lithium-ion battery has built-in electronics that automatically set the battery to a rest state if it is out of use for long periods. This protects against over-discharge. Worth noting! All STIHL batteries are supplied to dealers with a factory default charge level of 30%. Before first use, the battery should be charged to 80-100%.

The AP 300 S lithium-ion battery offers greater battery capacity to cover your needs for the bigger jobs. The AP 300 S features great battery capacity with long run times, as well as an ideal power-to-weight ratio and a weight of less than four pounds. ... Knock out tasks like storm cleanup faster with the professional-level performance of the ...

AK System batteries can be used with all the tools within the system---including blowers, chainsaws, hedge trimmers, mowers, and trimmers. The battery you choose can easily switch between tools, so you'll have a high-performance battery tool for every project---using long-lasting, quiet power for a job well done.

Choose STIHL battery chargers, including multi-chargers, to provide the fastest charging

Stihl lithium battery

times for your batteries.

Thanks to the latest cell technology, the STIHL AP 500 S battery can even withstand up to 2,400 charging cycles. The above-average service life of STIHL lithium-ion batteries reflects their special product quality. STIHL battery packs can also be used with many different STIHL cordless power tools - both older and newer power tool generations.

STIHL lithium-ion battery chargers also incorporate safety features so that if your battery is too hot when inserted into the charger after a long period of use, the charging process will only begin when it falls to an appropriate temperature. Avoid extreme temperatures when charging lithium-ion batteries.
