

Switching to renewable energy

It's possible to switch to a fully sustainable global energy landscape within the next 30 years, according to research. Greater geographical connectivity of solar, wind and hydro power, can reduce energy use and cut costs.

The Secretary-General outlines five critical actions the world needs to prioritize now to transform our energy systems and speed up the shift to renewable energy - "because without renewables,...

Transitioning to renewable energy is the key to securing humanity's survival, as "without renewables, there can be no future", according to UN Secretary-General António Guterres,...

Five ways to jump-start the renewable energy transition now. UN Secretary-General outlines five critical actions the world needs to prioritize now to speed up the global shift to renewable...

Transitioning to a decarbonised energy system by around 2050 is expected to save the world at least \$12 trillion, compared to continuing our current levels of fossil fuel use, according to a peer-reviewed study today by Oxford University researchers, published in ...

Countries around the world are exploring ways to transition away from fossil fuels. The transition, prompted by carbon emissions that exacerbate climate change, is vast and includes renewables such as solar, wind, and hydro.

Switching from fossil fuels to renewable energy could save the world as much as \$12tn (£10.2tn) by 2050, an Oxford University study says. The report said it was wrong and pessimistic to claim...

We need to revolutionize how we generate and use electricity, by making renewable energy sources like wind and solar more abundant, more affordable, and more accessible to everyone. See what we're doing about it.

How can we speed up the transition to renewable energy? Our vision is for a clean, green, and equitable energy future. The world needs at least a nine-fold increase in renewable energy production to meet the Paris Agreement climate goals and much more to achieve net zero emissions by 2050.
